*Numerology, Mantra, Running  
Computer, Chaldean, Country,  
Currency*

### ABSTRACT

Our country got many setbacks after it changed the name from Ceylon to Sri Lanka. In the Ceylon days we were one of the best countries of Asia. Even Singapore wants to be similar to our country. However, after the name was changed to Sri Lanka Tamil Elam war and Economic problems started in the country and it became one of the worst countries in Asia. In this paper authors tried to search that whether there was any impact on the name change to the existing prosperity of the country based on accepted numerological principles. Also, it was tried to study the possibility of a new name be applied to solve the country's ongoing economic crisis and other related issues. A new name was proposed based on the numerology and a program was operated in an infinite loop of computer. Results were obtained by analyzing the media news on economic progress of the country. Numerology is a subjective system that can show us another level of interpretation in the matters of life. New names were made according to Chaldean Numerology and the results were analyzed the after.

### INTRODUCTION

Of all the arts, the art pertaining to the numbers and letters in man's life is the most ancient one. Based on this art, the epics of three gods Brahma, Vishnu and Siva were written. As it is said in the book of Pandit Sethuraman, Science of Fortune, numerology describes the invisible powers of nature and their resultant action. (Sethuraman, 2014) Using numerology, we can make names and mantras. A name is considered a mantra. Mantras are mystic sounds which produce certain type of energies. 'Mananath Trayathe Ithi Mantraha'- Mantra protects the person who recites it (Goldman, 2015). This means Mantras are primarily invented by great seers for the welfare of the society.

A study by Gao et al (Gao et al., 2019), has found the neurophysiological correlates of religious chanting Using multi-modal electrophysiological and neuroimaging methods and emphasized that religious chanting possibly induces distinctive psychotherapeutic effects (Gao et al., 2019). Paper by Dudeja established among many, how a practitioner of mantra meditation can achieve a disease-free body and successfully perform the journey towards attaining bliss, self-realization and enlightenment (Dudeja 2017). The cosmic energy we always receive contains different energies coming from different celestial bodies. If one can chose the correct science and correct syllables they can make mantras such as names of persons, business, countries etc.

The correct science applied here is called numerology in English. What happens when a Mantra is recited? When we repeatedly utter a Mantra, we are tuning to a particular frequency and this frequency establishes a contact with the cosmic energy and drags it into our body and surroundings (Dudeja 2017). Thus, it helps to balance the energies and to increase the level of a certain type of energy, which promote certain actions and events in

our surrounding. For example, if we increase the planet Mercury's energy level, it promotes us to take intelligent steps in business.

### Background

Invention or the first use of the term Numerology has no date. The original idea of numerology is not the technique of calculation which is an old one but the notion is the result which is expressed as a digit carries with it an entire array of character traits (Jastrow, 1933). In the book of The Secret Science of Numerology by Shirley Blackwell, she depicts "A name creates an instant impression. Some of us love our names, while others are uncomfortable with theirs and change them. The author further emphasized that "I noticed that the sounds of various names give us different feelings, as though they are energies." Numerology is the fastest way for you to tap into your Authentic Self which is not the person your parents want you to be, nor the person your friendship circles wants you to be, but the person who finds their own unique niche and creates tremendous overall success within it.

### METHODOLOGY

All mantras came from the single sacred sound: OONN (Dudeja 2017). OONN is a combination of 3 main sounds: Aa-Vu-Ma. (Figure 1);

Aa represents Vishnu, the sustainer; VU represents Siva, the destroyer, and MA; represents Brahma, the creator. Aa-also represents the Sun, Vu-the Moon, and Ma-the Fire. There are more than 150 meanings uncovered from the sound OONN so far. It is said that lord Siva was the first to reveal mantras for the welfare of the mankind, through sages.

The numerological calculation of a English mantra is given below. The word is AMEN (this word maybe a

**Figure 1:** The Symbol of OONN

derivation of OONN)

Numerological calculation based on Chaldean System gives values for letters.

A=1

M=4

E=5

N=5

Thus, the word AMEN counts as 15.

Based on the objective of this paper, the numerological calculation of the name Sri Lanka and analyze is given below.

S	R	I	L	A	N	K	A
3	2	1	3	1	5	2	1

$$3+2+1+3+1+5+2+1=18$$

Based on Chaldean system word Sri Lanka represents number 18 (Cheiro pg 370).

Analysis of number 18 revealed "A rayed moon from which blood drops are falling. It is a symbolic of materialism striving to destroy the spiritual side of nature. It generally associates a person with bitter quarrels. Also, it associates with war. social upheavals and revolutions. When this compound number appears in working out dates in advance such a date should be taken with a great amount of care, caution and circumspection" (Cheiro pg 370).

- It generally associates a person with bitter quarrels, even family ones.
- This nature is evident through many of the political leaderships of Sri Lanka
- Also, with the recently concluded war. Further through social upheavals, revolutions such as July revolution in 1983, and the Aragalya. This suggests change in the method of writing the name of the country and it is proposed here as SREE LANKA.

Numerological analysis of the proposed new name is given below.

S	R	E	E	L	A	N	K	A
3	2	5	5	3	1	5	2	1

$$3+2+5+5+3+1+5+2+1=27$$

According to the Chaldean system this new name represents the number 27 (Cheiro pg 373)

According to the numerology, the number 27 is a good number symbolizing 'the Sceptre'. It indicates that reward will come the productive intellect; that the creative faculties have sown good seeds that will reap a harvest... It is a fortunate number if it appears in any connection with future events.

According to the numerology, Lanka will be a great country if we use this number.

Analysis of the name of the currency use in Sri Lanka is given below.

R	U	P	E	E	S
2	6	8	5	5	3

$$2+6+8+5+5=29$$

According to Chaldean system the word rupee represents the number 29. A Name indicating No. 29: According to Cheiro, (Cheiro, 2011) those under this name number often find it necessary to go to court to settle disputes. They will experience all sorts of problems in their families and will generally be let down by family and friends. Those who praised them yesterday may curse them today. These people live a life of mental agony and sorrow with their life partner. They get into deep troubles with the opposite sex. Any remedial measures taken to come out of such troubles may result in delayed solutions and huge loss of money and this aggravates the existing problem too. The personal life will be full of ups and downs. Family life consists of events similar to the feats in a circus! Unless the name number is corrected properly, these people will encounter problems forever.

(SETHURAMAN, 2014) Hence it is proposed to write the name of the currency as "rupees" by using two letter of "p"

R	U	P	P	E	E	S
2	6	8	8	5	5	3

$$2+6+8+8+5+5+3=37$$

According to the Chaldean system the proposed word rupees represents number 37.

Analysis of Name No. 37: This is a very lucky number. It will lift even an ordinary person to the most prominent positions in life. It brings success in love and the patronage of the elite. These people will have good friends from both sexes. They will be greatly favored by men if they are women and vice versa. As a result, their lives will improve greatly. People will come forward to invest their capital with such people. Accumulation of money and wealth will be easy through various means. They will have an active interest in the fine arts and in all probability, lead comfortable and luxurious lives. They will be renowned for their pleasing manners and countenance. Some of them will be philanderers because of their casual attitude towards opposite sex. This number, which gives unexpected success, is a desirable one (Sethuraman, 2014).

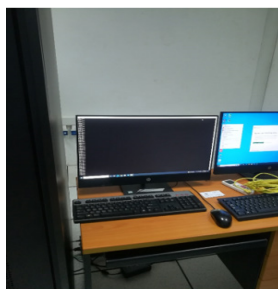

## IMPLEMENTATION

The names proposed and its analysis instead of the name Sri Lanka is given above and the next was its implementation phase. For implementation, a computer was used with a infinite loop to run the proposed names Sree Lanka and Ruppees in it. (figure 2) Running a computer loop resembled chanting Mantras. The starting date of running the programme 1st August 2022. Thereafter, developments of the country were carefully watched through news and media in systematic manner.

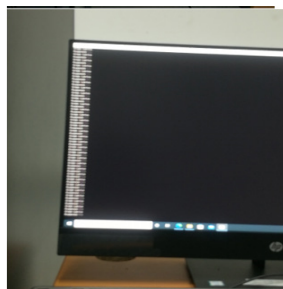

The program that ran on the computer is below

```
#include <stdio.h>
#include <stdlib.h>
int main()
{
    for(;;){
        printf("Sree Lanka\n");
        printf("Ruppees\n");
    }
    return 0;
}
```

Panel: 1

Panel: 2

**Figure 2:** panel 1 and 2: The proposed new names for the country and its currency, “Sree Lanka” and “Ruppees” running in computer infinite loop.

## RESULTS

The table 1 indicates the events reported in the media during the study period after implanting the newly proposed names.

**Table 1:** Events reported in the media during the study period after implanting the newly proposed names

Favorable news	Adverse news
For the country Sri Lanka fuel prize went down in 2022 August 4 and also Yupun Abeykoon and another one got medals at common wealth games after 24 years.	A few picketing and agitation/ Violence was occurred after August 1 to September 20, 2022.
IMF has approved 2.9 billion dollars to Sri Lanka in September 1, 2022	
US Aid Samantha Power has approved 65 million Dollars to Sri Lanka.	
Power has approved 65 million Dollars to Sri Lanka.	
Sri Lanka has won T20 Asia Cup final on 11 September 2022. Also, Sri Lanka has won the Asian Netball Championships.	
The tallest building in South Asia “Nelum Kuluna” opened for general public.	

## DISCUSSION

Numerological analysis of the name of a developed country is given below.

AMERICA=1+4+5+2+1+3+1=17

According to Chaldean the word America represents the number 17 (Cheiro, pg 370)

“Number 17 is a symbol of Peace and Love...The person represents have risen superior in spirit to the trials and difficulties of his life or his career. It is a fortunate number if it works out in relation to future events” (Cheiro, pg 370).

Some other countries having good numbers according to numerology include Canada, Switzerland, Bangladesh, China and Denmark.

Some names of countries with unlucky numbers based on numerology Somalia (number 20), Venezuela (number 43), Zimbabwe (number 28), Iran (number 9), Lebanon (number 28), England (number 26), Japan (number 16), India (number 12). (Worst Countries to Live in 2021, n.d.)

On the other hand, there are some other countries whose real performance and their numerological number of the name of the country do not obey the numerological readings. Some of those countries are given below. (World Population Review, 2021)

Afghanistan (number 37) - the number is lucky according to numerology. However, Afghanistan has a war.

Madagascar (number 23) -despite having a lucky according to numerology the country is a very poor country.

Singapore (number 35) – Despite having an unlucky number according to numerology, a good country Explanation of the above situation is beyond numerology and it appears intervening of another force which neutralize or balance the powers. However, based on the prediction Afghanistan and Madagascar will be good countries in the future.

## CONCLUSION

Based on the results obtained, a positive change in the country and economy have been visible between the recent time period from 1st August, 2022 to 26th September, 2022. Based on numerological analysis, most of the developed and countries considered as good have good numerology such as America, China, Canada etc. Most underdeveloped countries have bad numerology such as Iran, Somalia, Lebanon. According to the study, numerology names seems to have an impact on the country and the places it is used. Furthermore, the authors like to continue the research for another 6 months with a running computer to obtain more data on the proposed new name’s impact to the country and the economy.

## Acknowledement

Authors wish to thank the staff of Faculty of Computing, NSBM and the IT Department of NSBM for allowing to use a computer to run the program and Professor Navaratne, Professor Kaluarachchi and Professor Iresha of University of Colombo for their assistance provided.
